Why Write?

Words by Max Fenster

The cool thing about writing is…
other people can read it!

Machines can read it too!

You can write to
plan surprises.

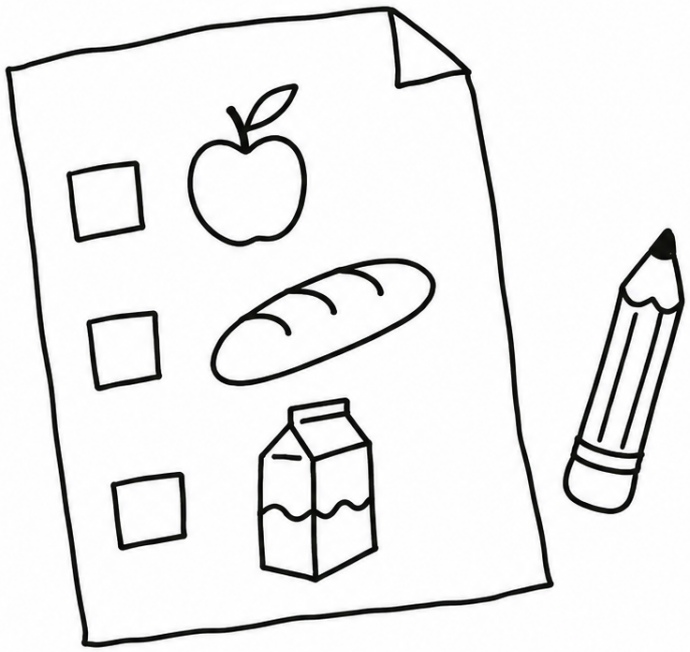

Or to send secret messages back and forth.

You can write notes for people to find after you leave.

Write reminders, to-dos, and shopping lists.

Or share feedback, reviews, and suggestions with friends.

In life you will find,
wherever you go,
writing is a useful skill to know.

What will you write?

A note? A list? A surprise?

Draw it. Say it. Try writing it.
